

FIG. 1a is a block diagram of a system 10 for monitoring a web page 18. The system 10 includes a monitor 16, a web server 14, a network interface 12, and a communication path 22. The monitor 16 is connected to the web server 14 via a control/monitor path 20. The web server 14 is connected to the network interface 12 via a communication path 22. The network interface 12 is connected to the communication path 22. The communication path 22 is connected to the web page 18 via a communication path 22.

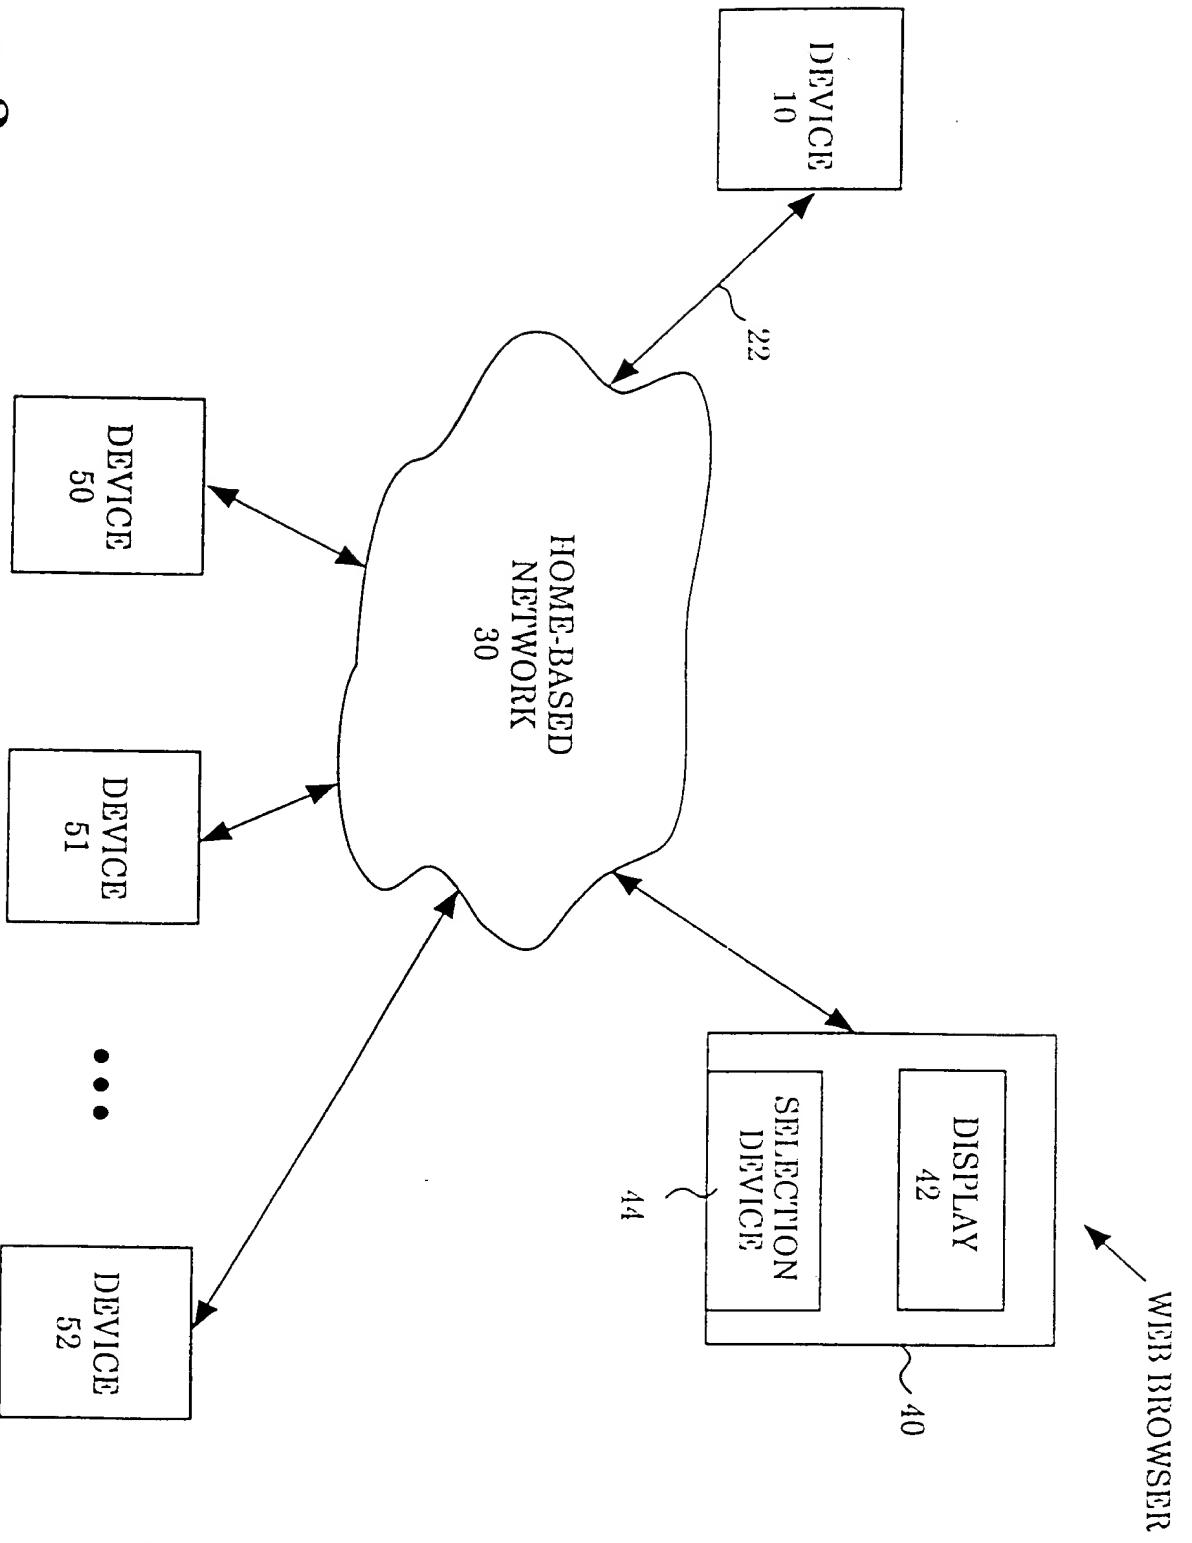

Figure 2

FIG. 2 is a block diagram of a network system. The system includes a web browser 40, a home-based network 30, and a selection device 44. The web browser 40 is connected to the home-based network 30 via the selection device 44. The home-based network 30 is connected to a device 10, a device 50, a device 51, and a device 52. The selection device 44 is connected to the home-based network 30 via a bidirectional arrow 22.

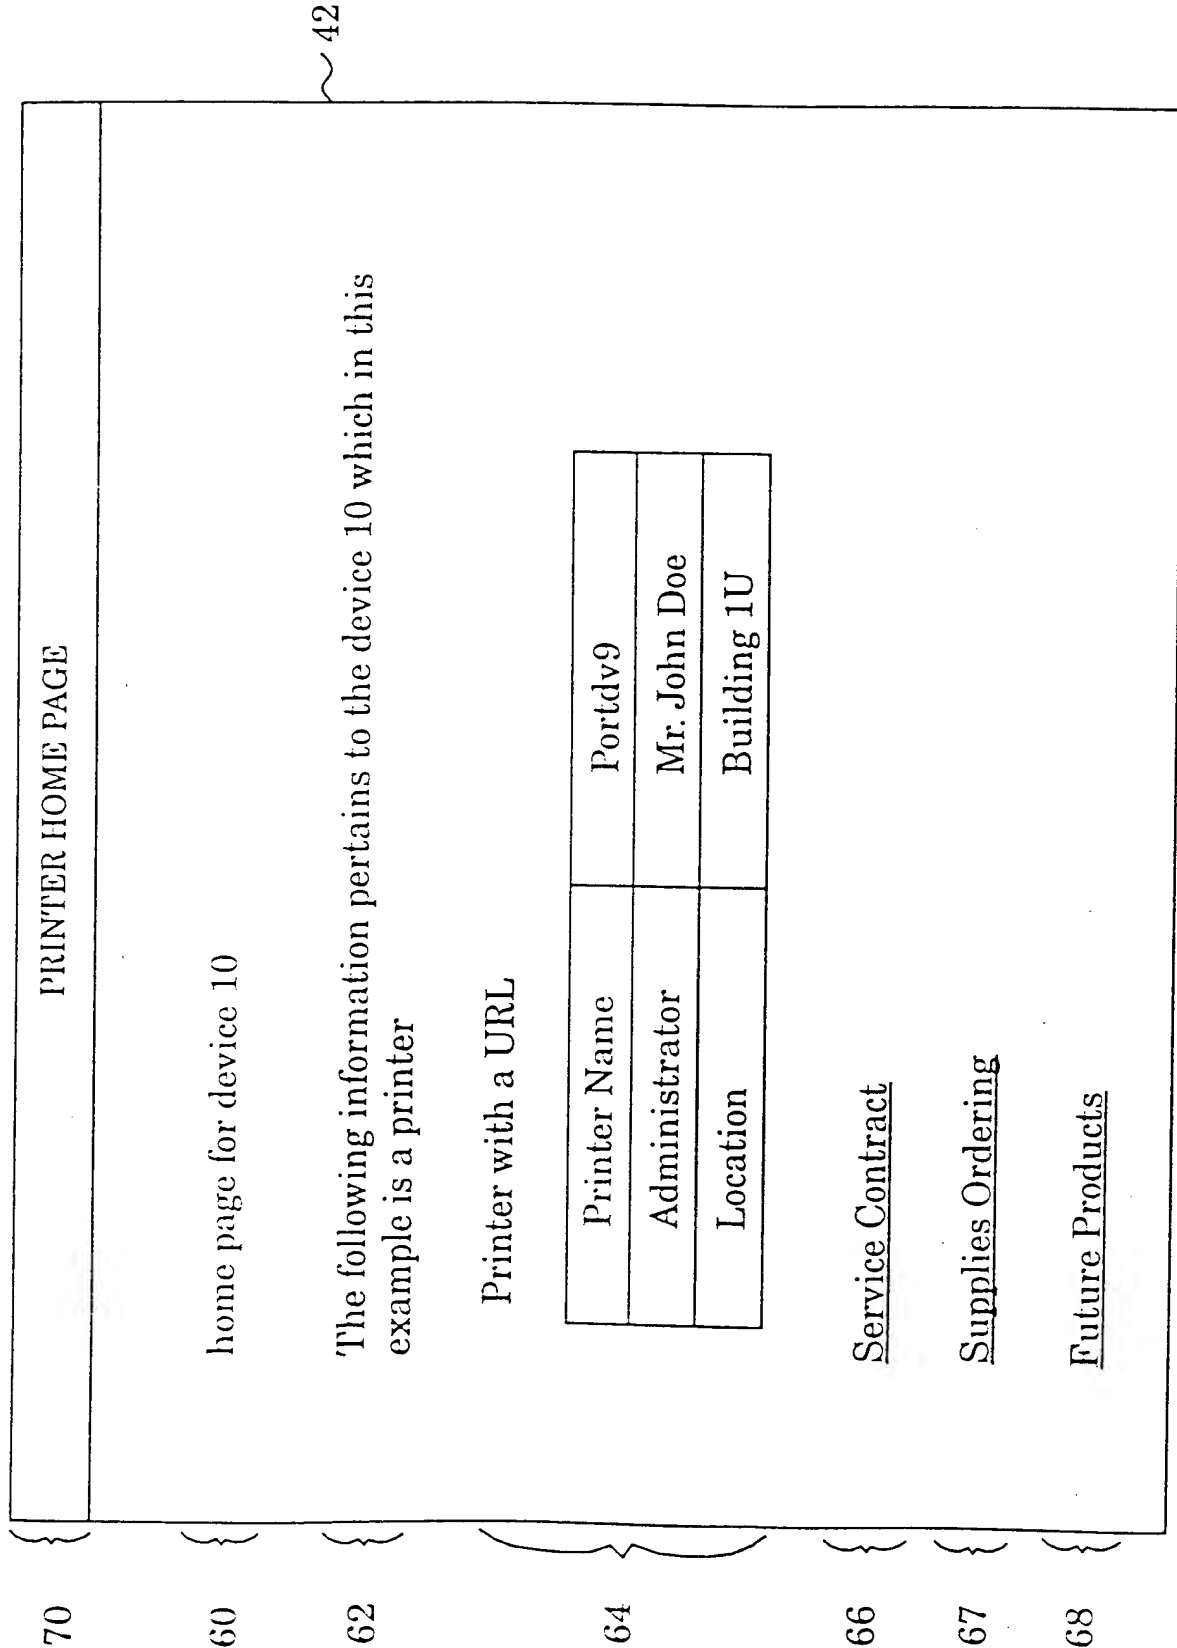

Figure 3

FIG. 4 is a block diagram of a network system. The network system includes a central network 80, which is connected to a plurality of devices 10, 50, 51, 52, and 92. The network 80 is also connected to a plurality of computer systems 90 and 91. The network 80 is connected to the devices 10, 50, 51, and 52 via a bus 22. The network 80 is connected to the computer systems 90 and 91 via a bus 22.
